## Sweden

**WISP** (supplies internationally)

*This RaceRunner is made from aluminium and comes in three frame sizes, M, L and XL. The weight of the frame for size L is 4 kg. A complete RaceRunner has a weight of 12 kg, with variations up and down depending on the choice of parts.*

*WISP Adapter© - provides the option of using standard bicycle wheels. The WISP Adapter©, together with the design of the frame and fork, makes it possible to use "fat bike" tires for training off road.*

*WISP Spring© - makes it easy to adjust the steering function to your needs. It's also a safe and reliable steering solution for all runners.*

*WISP BoxFrame© - is a new innovative frame solution. Its extreme stiffness and strength makes it a light and durable construction. The BoxFrame© provides conditions for fast running.*
